

## EDITORIAL.

## 7th Journey of Postgraduate Chemistry

This edition of The Orbital: The Electronic Journal of Chemistry represents a special volume in commemoration of the 11<sup>th</sup> anniversary (2006-2017) of the Post-Graduation Program in Chemistry of UNICENTRO (PPGQ/UNICENTRO).

Entitled "Applied Chemistry: Innovation and Sustainability", reflects the thematic projects developed or under development during this period of activity of the PPGQ / UNICENTRO. The event was attended by 85 participants: undergraduate, master's and doctoral students, with submission/acceptance of 48 abstracts, of which 24 were in the form of ORAL and 24 in the form of Posters.

For special edition 17 manuscripts were submitted in Full Paper format, which were evaluated by ad hoc referees, and 13 of these manuscripts were accepted to compose the special volume of The Orbital.

The experience of organizing the event and proposing a special edition of a scientific journal was satisfactory and shows that new special editions can be proposed in a programmed way and will be an inspiration for students to participate in the event, aiming to submit Full Paper manuscript.

We thank the reviewers who provided the blind assessment, and everyone who contributed to the realization of the 7th Journey of Postgraduate Chemistry.

Fauze Jacó Anaissi (UNICENTRO)
